

# Soil Health for Vegetable Producers

**Monday, March 11, 2019**

**8:45am-4:00pm**

Stonewall Farm, 242 Chesterfield Rd. Keene, NH 03431

Register at: <https://tinyurl.com/ybuoa5c5>

**Wednesday, March 13, 2019**

**8:45am-4:00pm**

Gilford Community Church, 19 Potter Hill Rd. Gilford, NH 03249

Register at: <https://tinyurl.com/y9m2h627>

**Thursday, March 14, 2019**

**8:45am-4:00pm**

Three Chimneys Inn, 17 Newmarket Rd. Durham, NH 03824

Register at: <https://tinyurl.com/yaetsv3e>

For more information or assistance with registration call Amanda at: 603-756-2988 x116

## **ABOUT THIS WORKSHOP:**

Jan-Hendrik Cropp from under\_cover in Germany will deliver critical information that NH farmers can employ to better mitigate the effects of flooding, drought, and the increasing frequency and intensity of storms.

Topics to be covered include: no till/low-till, living and/or dead mulching, cover crops, rotational conservation, and more.

There will also be a farmer panel facilitated by UNH Cooperative Extension to discuss how reduced tillage operations are working in New England. Farmers attending will receive info on new no-till transplanter and complimentary equipment that will be available for use through NH Conservation Districts starting in 2019.

Jan-Hendrik Cropp has been working for years in vegetable production and arable farming as a farm co-manager. He has been active as a consultant and presenter for soil health for 5 years through his business called under\_cover. He acquired his knowledge through his own farming practice, studied organic agricultural sciences and has done various soil health research trips throughout Europe and North America (2015, 2017). His passion and specialty are mulching systems for vegetable farms which he has pioneered together with many colleagues over the last couple of years and which he tries to underscore scientifically with various on-farm-trials.
